

TOOLING SETUP KIT

Tooling Set-Up Kit Features:

- Pick up multiple tools in a fraction of the time compared to doing it on the machine manually
- Easy, accurate
- Never worry about breaking or chipping inserts when picking up heights or offsets on the machine
- Touch point sensor accurately picks up X,Y, and Z in less than a minute
- Helps to eliminate machine down time and allows you to set up tools on the fly
- Enables you to recheck tool height after insert change or drill sharpening
- Easy to read digital display can be changes for imperial or metric at a push of a button
- Refractometer allows you to keep a close look at you coolant to water ratio daily. This is a very important variable to optimize tool life and surface finish
